- Neuro-ophthalmology,
- Magnetic resonance imaging

Dear Colleagues,

As a special issue of eOftalmo, we will have the opportunity to appreciate “The World of Images in Neuro-ophthalmology”, with clinical cases richly illustrated and commented.

This special issue will consist of clinical cases of the most relevant subjects in the daily life of neuro-ophthalmologists, developed to provide readers with a brief update. Each case will be presented with images, followed by a brief topic discussion. This special issue will be anchored by 10 invited articles that will contribute to developing a conceptual framework for diagnosing and managing the most important neuro-ophthalmological disorders.
